

Week 2 – Photo Activity: Physical Properties & Mixing Laws

Geophysics IIIA: Potential Fields & Geothermics

Student Name: _____ **Group:** _____

Instructions: As each photo is shown (micro-, meso-, or macro-scale), fill in your responses:

- Identify the **fabric/geometry**.
- Select an appropriate **mixing law for density** (ρ).
- Select an appropriate **mixing law for thermal conductivity** (k).
- State whether the material is **isotropic or anisotropic** at this scale.
- Describe briefly how your interpretation might **change at a different scale**.

Photo	Description	Mixing Law		(I)sotropic / (A)nisotropic	Scale Micro / Macro / Meso
		Density	Thermal Conductivity
