

Week 4 — Match-Three: Cross-Sections ↔ Gravity Profiles

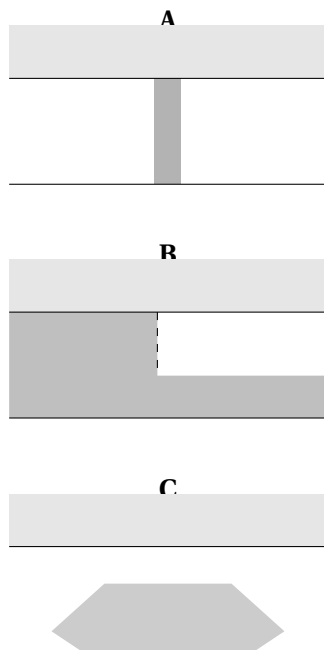

Geophysics 3A: Potential Fields & Geothermics

May 27, 2026

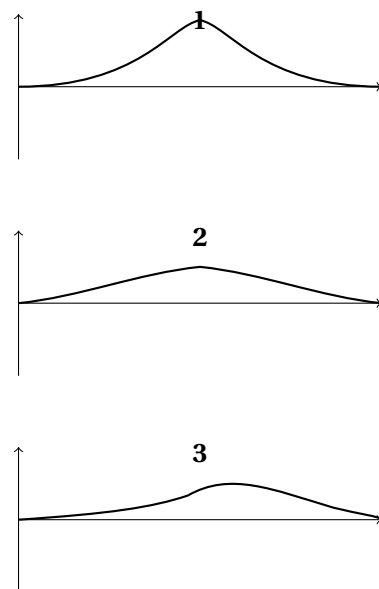

Instructions

Match each gravity profile (1–3) to the most plausible cross-section (A–C). Justify using: (i) half-width/FWHM (depth cue), (ii) edge/asymmetry clues, (iii) amplitude scaling with $\Delta\rho$ and size. Propose one auxiliary observation to break ties.

Cross-Sections (A–C)

Gravity Profiles (1–3)

Your matches: A → _____ B → _____ C → _____

Tie-breaker observation (and why): _____
